Prolumo Work SuperFlat LED work-lamp, Flood 10-30V 2900 lm

Super flat LED lamp. It can be used, for example as a work lamp or as an extra reverse light.

A super flat LED lamp can be used for work-light or extra reversing light. With its very flat design, it can be placed in many places, where there is not a lot of space and where you almost will not be able to see it. Nevertheless, it has a very high light output with its 2900 raw lumen.

The lamp is only R10-approved (EMC) and is therefore not approved for a specific purpose. The wires should be connected as follows:

- Red: + / Plus
- Black: - / Minus

Produced in black-colored aluminum with a plastic front.

Light color: 6500K
Wire length: 50cm

Very simple mounting with the included bracket, tape, bolts and screws.
