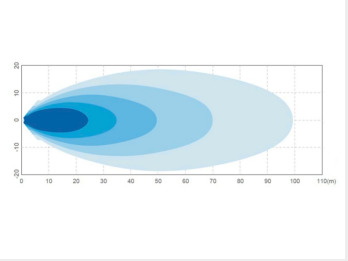
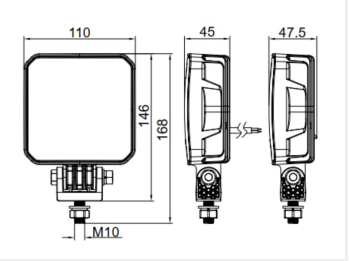
Prolumo Work 36W - LED lamp in TermoPlast

Latest generation LED lamps in ThermoPlast, weather-resistant, high performance, lightweight. Options for DT connector or 50 cm cable. 4550 lumen





The latest generation of LED lamps constructed in ThermoPlast. Both the housing and the bracket are made of this material. This ensures that the lamp is not affected by weather conditions and maintains a nice surface even when exposed to wind and weather.

Although the lamp is constructed with a plastic housing, the ThermoPlast allows high performance and low weight. In addition, the lamp is equipped with thermal control that prevents overheating of the components. This way, you get the best combination of brightness and durability.

Choose between integrated DT connector or 50 cm cable without a connector.
