PTFE lubricant - 3.5g

Effective PTFE/silicone lubricant, penetrates metal, ensures lasting lubrication without residue. Ideal for hinges, bike chains, and car parts.

Lubricant with PTFE / silicone, designed to penetrate deep into metal surfaces, providing you with quick and efficient lubrication without leaving sticky residues. This means your mechanisms run smoothly and last longer.

The lubricant is easy to use and long-lasting, making it reliable for everything from hinges and bicycle chains to car parts.

Does not dissolve in water
