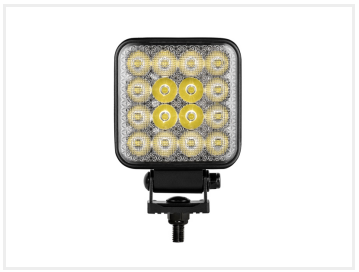
Prolumo Work COMBO 56W - LED worklamp, 10-80V

Get the best of both worlds - a combined work and spot light in one lamp.



A work light that combines the best of both worlds. With its flood lenses on the outer edge and spot lenses in the center, you get a combo light that provides a wide work light as well as forward-facing light that can shine up to 405 meters at 0.5 lux. The light color is 5700K.

Aluminum housing with strong powder coating and stainless steel brackets.

The lamp includes built-in thermal control, which dims the brightness if the components overheat. This gives the best combination of brightness and durability.

At its highest, it delivers 5495 effective lumens, reducing to 2728 effective lumens at its lowest.

Brackets, bolts, and nuts for fastening are included.
