Matronics Neon top lamp for Volvo 2012+ Type 3

Top position lamps for the corners of Volvo FH trucks with a sleeper cab (CAP-SLP). Available in single and dual color.

Top position lamps for the corners of Volvo FH trucks with a sleeper cab (CAP-SLP). A complete lamp consists of a Matronics Neon marker light, that is screwed on to a plastic housing, using the included screws. It is important that you seal between the lamp and the housing, specifically the hole for the wires, to prevent water ingress.

There is no gasket included for this lamp, so it is required that you reuse the original angled gaskets. This also includes the two screws used for fastening the lamp to the truck

Dual color models

Dual color corner-lamps change between yellow and white light, by swapping plus and minus. This requires changing the original wiring, and is controlled with a color changer controller or a 2-pole switch.

Extra neon lamps

The Neon lamps can also be bought seperatly, if you wish to use them elsewhere on the truck.
