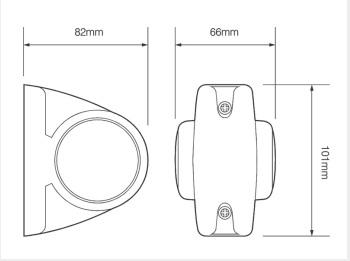
# Short LED Stalker Lamp

LED stalker lamp in flexible rubber base. Designed for hard use on work vehicles. ECE-approved and a 5-years waranty. 12V and 24V.



Nice and simple LED stalker lamp in a short flexible rubber base, intended for marking with red and white position light and models with a built-in yellow sidemarking light.

The lamp is multi-volt, so it can be used on both 12V and 24V.

The lamps are designed for hard use on work vehicles. They are protected against impacts and vibrations, completely waterproof and they can be fully immersed in water (IP67). Because of this the manfucturer issues a 5-years warranty.

The lamp is ECE-approved and EMC-approved.
