HORTUS 12V transformer

230V to 12V transformer for Hortus spots and lamps. Available as 20W models. A Hortus plug is included for an easy connection.

230V to 12V transformer for Hortus spots and lamps. Available as 20W model. The transformer has a 2-meter cable with a 230V plug and a Hortus plug for easy connecting.

You should calculate the total consumption before you pick a transformer. If you have over 20W, you need to purchase extra transformers and split the lamps.
