

T-track guide-rail system - Bottom clamp for small tracks

Clamp that fits in the small tracks on the fence-profile, tape measure profile and the mini-profile.

Clamp that fits in the small tracks on the fence-profile and the mini-profile.

The clamp cannot be turned in the track. It is an obvious choice when you want to fix a track on a table / sheet of wood, and use the rail as a guidewhen sawing or milling. If the track is fixed in to a table, you can use the clamp for fixing parts.
