

A Gargano Plastic Front

A curved plastic front for Gargano profiles - An easy mounting by pressing down the profile.

A curved plastic front for Gargano profiles - an easy mounting by pressing down the profile. The curved plastic will give a greater light scattering, but will also absorb some of the light.

The front will be 6 mm over the edge of the profile, where it will be mounted on. A Gargano profile with a front has a total height of 15 mm.
