

## 12V DC for 230V AC Converter - 150W

A voltage inverter that converts 12 V DC to 230 V AC, so that you can connect regular 230V appliances to a car, for example.

A voltage inverter that converts 12 V DC to 230 V AC, so that you can connect regular 230V appliances to a car, for example. Max power is 150W at 0.65A at 230V. There is also a standard USB plug that can be used for standard USB units. Max. USB current is 2.1A.

- For 230 V electronic devices and 12V DC supply systems
- ON/OFF Switch and LED indicator
- An additional fan and a USB port (1200 mA)
- Auto power off
- Short circuit and over current protection by fuse
- Cooled by fan and cooling fins
- A female socket with
- A children protection

### Connecting and Operating:

The use is simple and secure, as long as it is done correctly.

- Compare the specifications of all used devices and check them for being compatible to each other.
- Connect the product to an easily accessible 12V car socket.
- Make sure, the operating LED is shining. For some car types you have to switch on ignition.
- Connect your household electronic device to the SAFTEY socket. Therefore, attend to the maximum power of 150W. Heat and coldness generating products normally have a too high energy consumption for this product.
- Connect your USB device to the USB Output. Therefore, attend to the maximum current of 1200mA.
- Switch the ON/OFF switch to ON (-).
- Switch the ON/OFF switch to OFF (o) after use and disconnect all cable connections.

## Product overview

### 12V DC for 230V AC Converter - 150W

SKU 503101  
Output voltage: 230 V (AC)  
Input voltage: 12 (DC) V  
Output Efficiency: max. 85%  
Temperature: +5~35°C  
USB Output: DC 5V (1200mA max.)  
Dimensions: Ø70 x 145mm
