

A Solid State Relay, 3-32V Input, 5-120V Switch, 5A

A silent relay that is used for many or very fast activations, where a mechanical relay is not optimal.

A silent relay that is used for many or very fast activations, where a mechanical relay is not optimal, as it quickly gets worn out.

There are screw terminals on the input and output side.

The relay can only be used for DC control signal and DC switching. There is an indicator on the relay for showing the status.
