Functiongenerator, 2 channels, 5Mhz - AX-DG105

Function generator with 32 waveforms, sinus, square, triangle, ramp pulse etc. 10 bit wave length, 8 bit amplitude.

2-channel function generator with 32 waveforms, sinus, square, triangle, ramp pulse etc. The generator has a 10 bit sample rate (1024 points) and 8 bit amplitude resolution. The generator also has built in frequency and amplitude sweep as well as other modulations (FSK, ASK, PSK).

All settings are easily adjusted with push-buttons and the display.

For complete overview see datasheet under downloads

The software and the cable makes it possible to control the function generator via PC (RS232 port required).

Product overview

Function generator

SKU 506001
Dimensions: 195 x 295 x 415mm

Accessory: Software and cable

SKU 506002
