

Bridge rectifier – Max 50V, 8A

Simple rectifier bridge, that ensures that you always get the correct polarity connected.

Simple rectifier bridge, that ensures that you always get the correct polarity connected. The voltage from outside is connected to the input pins, where after the voltage on the output pins will be correctly polarized on the plus and minus pins.

The rectifier has a voltage drop of 1V, max current is 8.

The cables on one of the variants is 50cm long.

See the datasheet for all specifications.

Specifications

Max voltage 50V

Max current 8A

Product overview

With pins

SKU 509802
Dimensions: 7 x 43.2 x 24mm

With cable

SKU 509802-K
Dimensions: 7 x 43.2 x 24mm
