Front cover for LED light bars

Plastic-shields that fit our most common light bars. They give the effect that the light bar is divided into two.

Plastic-shields that fit our most common light bars, both on straight and on bent models.

Yellow cover

The Yellow ones convert the white light into a nice yellow light that is known from yellow halogen bulbs.

Clear cover

The clear ones can be used for protection.

Black cover

The black ones give the effect that the lightbar is divided into two.

However, theoretically speaking, it will still be a problem in ralation to the danish law of pairing, as the lamp is still only supplied by one cable. Contact a technical inspection center in case of doubt and questions regarding related legislation

matronics.
