

Serie 30 - Picking box

Smart box that can be put down in the front edge of a series 30 profile. Can be used for components, tools or similar. 105 X 130 X 50mm

Smart box that can be put down in the front edge of a series 30 profile. Can be used for components, tools or similar.

The box can easily be taken out of the profile again. The included rubber-feets makes it stand securely on a table, where after it can be put up in the profile again after use.

There is a small window with a label, for noting the content of the box

The box can only be used in our 3030 with 8mm track.
