WAS ROAD LINER LED sidemarkerlamp 12-24V

LED marker lamp by WAS with reflex, NEON-look, and "Road Liner" that, in addition to shining to the side, also shines down to the road.

LED marker-lamp by WAS with built-in reflex, NEON-look, and "Road Liner light. This gives you a marker light which, in addition to illuminating to the side, also lights down to the road. This makes it much easier to reverse, as you have arrow marks on the road that guides you to where your trailer is. In addition, it can also give a nice effect to, for example, illuminate your mud flaps, etc.

By having the Neon-look you do not see the individual LEDs but give a diffused light. The lamps can be used for side-marking and position-lights front and back. Available in yellow, red, and white.

The lamp is mounted to the supplied mounting brackets and the additional screws and washers. The lamps have a 24cm cable. Can be used for both 12V and 24V.

All models are E-approved.
