Standard :

12" version: 8.000 theoretical lumen - 1 Lux @ 437meter

22" version: 16.000 theoretical lumen - 1 Lux @ 450meter

The XPA version has a lower reference number, but shines significantly longer/wider than standard in Xperience Mode:

8" version: 4.350 theoretical lumen - 1 Lux @ 544meter

12" version: 6.757 theoretical lumen - 1 Lux @ 529meter

22" version: 13.514 theoretical lumen - 1 Lux @ 767meter

32" version: 20.271 theoretical lumen - 1 Lux @ 942meter

42" version: 27.028 theoretical lumen - 1 Lux @ 1.110meter

The dual-color position-light gives you the possibility to change between white and yellow positions-light as you feel like it so that it fits your vehicle.

The combo-light takes the best of a "spot-" and "flood" light bar. On each side, there are flood lenses, and in the center, spot lenses. This way you have a good combination of the broad light spreading from the sides and the focused light in the center.

The lens glass is produced in polycarbonate and the lamp housing is made of powder-coated aluminum to achieve a sleek design and good cooling for the LEDs.

There are brackets included for mounting and also a pre-mounted 4-pin DT plug, which makes the installation much easier.

- Black: Minus / -
- Red: High-beam
- White: White position-light
- Yellow: Yellow position-light
