

Matronics Sublight 6 Underwater Light

The Sublight 6 lamp has double the number of LEDs, but almost 4 x more light output. Housing in anodized alu and plastic.

Updated and larger model of our Sublight 3 lamps, with almost 4 times more light than the original. The 6 powerful 5W LEDs create a fantastic bright light, and the large 15 degree lenses create a focused beam, with a long visible range.

The housing is made of strongly anodized aluminium and plastic, and with all the electronics encapsulated in resin, you do not have to worry about it being mounted under water.

The lamps have a built-in powersupply, that can be connected to 12V-30V. dc
