

LED emitter for Hella Talmu DRL lamps

Large and bright emitter that fits in to the original Hella Talmu DRL lamps. 12V and 24V. Creates a nice bright light in the whole lamp. Dual color.

Large and bright emitter that fits in to the original Hella Talmu DRL lamps. It creates a nice bright light in the whole lamp. Available for 12V or 24V, in different combinations of dual color.

The emitters are sold as 1 pc.

The original reflector is taken out, and the emitter placed directly in. 4 rubber washers are included, that hold the emitter in place. There is 10cm wire on the back for connecting it to power. Even though the print is coated for protection against water, you should still make sure that the lamp is sealed.

Dual color

The dual color model has 3 wires, a common ground and a plus for each color. Typically you will connect this to a toggle-switch or relay for color change.

Dual color + flash

Standard strobecolor is yellow, but it can be customized to eg. blue or white for special purpose vehicles. The 12V model has 3 high power strobe LEDs, while the 24V has 6.

There is 7 meter cable on the emitter with M8 connectors, that can be connected to the included controller. The controller manages the two colors, and automatically turn them off when you enable the strobe light. The controller itself has 5 meter wire. The cable has 4 wires:

- Minus - Green cable
- Plus for white position light - White cable
- Plus for yellow position light - Yellow cable
- Plus for strobe light - Brown cable

Diffuser

The diffuser gives the light a neon-look, where it is not possible to see the individual LEDs on the PCB. The diffuser only fits our LED emitters.

The diffuser is made of a frosted plate and two springs. The glass is removed from the lamp, and the two springs are places over the two screw bosses, and the diffuser placed on top of those, and the lamp is closed.

Specifications

LEDs 24 x 2835

Power 5,8W @ 24V

12V, Dual color Yellow / Xenon white

SKU 190776-AMCW

12V, Dual color Red / Xenon white

SKU 190776-RDCW

12V, Dual color Yellow / Xenon white + Strobe

SKU 190777-AMCWAM

24V, Dual color Yellow / Xenon white

SKU 240776-AMCW

Voltage: 24V-30V

Dimensions: 56 x 130mm

24V, Dual color Red / Xenon white

SKU 240776-RDCW

Voltage: 24V-30V

Dimensions: 56 x 130mm

24V, Dual color Yellow / Xenon white + Strobe

SKU 240777-AMCWAM

Accessory, Diffuser

SKU 240776-DIF

12V, Dual color Yellow / Warm white

SKU 190776-WWAM

12V, Dual color Red / Yellow

SKU 190776-AMRD

12V, Dual color Yellow / Warm White + Strobe

SKU 190777-AMWWAM

24V, Dual color Yellow / Warm white

SKU 240776-WWAM

Voltage: 24V-30V

Dimensions: 56 x 130mm

24V, Dual color Red / Yellow

SKU 240776-AMRD

Voltage: 24V-30V

Dimensions: 56 x 130mm

24V, Dual color Yellow / Warm White + Strobe

SKU 240777-AMWWAM

A custom LED strip board, likely for a light dimmer. It features a central potentiometer with a black knob and four mounting holes (two on the left, two on the right). The board is populated with numerous small yellow LEDs and various electronic components like resistors and capacitors. The board is white with a yellow border.
