Legally usable on public roads.

Buy online at:

www.matronics.eu/129332

In this overview, you can see Osram's list of approved vehicles for this specific LED headlight.

The kits are complete with two LED emitters, and connector/cable sets for replacing the original emitters with 6000K. For cars with bulb-control, it is also possible to purchase Canbus kits for 12V.

Large light output

The light output is 1650 / 1000 (high / low) lumen pr. LED bulb - A standard halogen bulb is typically around 1000~1500 lumen.

Mounting

It can be a bit tricky to find space to mount the LEDs on some cars since they need more space in the headlamp than normal halogen bulbs.

CANBUS / Pear Control

For some cars, it may be necessary to go with canbus kits to avoid error messages on the car lamp control.

H4

SKU 129332

Colortemperature: 6000K

Brightness: 3300 / 2000 (nominal per set)

Work temperature: -45 til 85 grader

Voltage: 12V DC

LED power: 20 / 19W (nominal per set)

Lifetime: 3000 timer

Socket: P43t
