

Strands Nuuk E-line DUO licenseplate LED bar - 95W

Strands Nuuk E-line DUO license plate frame with built-in high beam bars for a discreet solution.

The Strands Nuuk E-line DUO is a license plate frame with built-in high beam bars that provide powerful long-range lighting on the road. This way, you achieve a very discreet solution and avoid drilling holes for the high beams on your car by simply replacing the current license plate frame.

The LED bar is split in the middle, so it is classified as 2 separate lights, each with its own E-approval, to meet Danish regulations requiring pairwise mounting of high beams.

The license plate frame fits license plates from Denmark, Austria, and Finland.

The total consumption is 95W, producing 9,200 theoretical lumens. Each has a reference of 20, giving a total reference value of 40.

Included are mounting brackets and a pre-attached 3-pole DT wiring harness with a corresponding counterpart, making installation very simple. There is a built-in work relay in the LED bar, so you only need to connect as shown below:

- Black: Battery: Ground / -
- Red: Battery : +
- White: + Signal from the car's existing high beam.

Approval: ECE R149, R10, CE
