Matronics emitter for Volvo toplamps 2024+ - Without high beam

Bright LED emitters that replace the original in Volvo Top lamps from 2024+. Available in single color and dual color.

Powerful LED light sources that replace the original in Volvo Top lamps from 2024+ in all models and Aero, which do not have high beams. The light source is available in single color and dual color options and is significantly more powerful than the original.

The single color model is connected like the original, while the dual color model requires a Dual Color color changer (polarity inverter). A new original plug is included.

Installation requires some modifications to the lamp but is a relatively easy task with the description below (approximately 20 minutes). See the manuals for the complete instructions.
