

Prolumo Work 36W - LED lamp in ThermoPlast - restsalg 382

Connects with wire

Note that this product is a clearance sale. We only have 2 products(s) in stock.

The latest generation of LED lamps constructed in ThermoPlast. Both the housing and the bracket are made of this material. This ensures that the lamp is not affected by weather conditions and maintains a nice surface even when exposed to wind and weather.

Although the lamp is constructed with a plastic housing, the ThermoPlast allows high performance and low weight. In addition, the lamp is equipped with thermal control that prevents overheating of the components. This way, you get the best combination of brightness and durability.

Choose between integrated DT connector or 50 cm cable without a connector.

Facts for 50cm kabel - ingen stik
Approvals: EMC R10, CISPR 25
Effective Lumen: 3650
Raw Lumen: 4550
Viewangle: Combo
