

Black-series SLIM LED Light Bar, 10-30V - restsalg 388

Has been installed in store

Note that this product is a clearance sale. We only have 1 products(s) in stock.

Slim "2.0" LED with a single LED line and a powerful spot-light, that is designed in a nice and slim black housing. With "hidden" LED's that gives an anonymous look and discreet look with the dark background. The LED lightbar has a focused and long light beam - perfect for spotlight.

Combo model i E-approved and takes the best of flood and spot. On each side sit flood lenses and in the center - spot lenses. This way you have a good combination of the broad light spreading from the sides and the focused light in the center.

Flood provides a diffused and shorter light beam.

The LED lightbar is produced in an aluminum-housing with a glossy black finish. The result is a light and slim design with optimal cooling for the LEDs. The front glass is polycarbonate, which has a very high tensile strength. The lightbar comes with a cable mounted to a waterproof connector.

Assembly:

The light bar is very easy to install with the included pins, washers, bolts and nuts. The legs are mounted at a suitable distance, after that the bolts are clamped into the side.
