

Original Scania Emblem with LED edge, IP65 - restsalg 400

Clearance sale of brand new original emblem with yellow/orange light

Note that this product is a clearance sale. We only have 1 products(s) in stock.

Waterproof Scania emblem with LED edge / outline. Depending on the model chosen. the base is made of clear, or in special frosted white acrylic, which is illuminated by LEDs.

A 3 meter cable is mounted, fixed in relief. Light strips are used that match the color of the light base for the Scania sign.

Frosted base

The frosted base gives the emblem a nice neon outline, visible both night and day.

Mounting with screws

There are built-in M5 threaded inserts in the base, mounting parts are purchased separately. Bolt set: 2 x 10mm and 2 x 20mm bolts, as well as 2 nuts and a screwdriver. It is important not to tighten the bolts too far, as this will destroy the embedding.

Mounting with tape

You can purchase double-sided adhesive tape. We recommend that you use at least 3 x tape for each emblem. The tape is high quality 3M VHB.

Window holder with suction cups

The emblem is screwed onto the window holder, using the nuts included. The 3 suction cups ensure that the emblem is firmly attached to the window.

Facts for Frosted, Yellow
