

H4+R2 Osram Night Breaker Vintage LED kit, +330% 2 pack, E-approved

OSRAM LED Vintage offers brighter light and classic look; 330% more light, warm white, 5x lifespan. 12V compatible

OSRAM LEDriving HL Vintage – more light, classic look

This LED retrofit lamp delivers up to 330% more light than conventional halogen bulbs, significantly improving visibility – even in older headlamp designs. This helps drivers spot obstacles and hazards earlier.

The warm white light (3000 K) preserves the vehicle's classic appearance, while the optimized light distribution reduces glare. It operates reliably even in older electrical systems and offers up to five times longer lifetime compared to halogen bulbs.

LEDriving HL Vintage is 12V compatible, easy to install, and emits neither UV light nor excessive heat. Supplied as a set with a 4-year OSRAM warranty.

Note: This product is E-approved.
