H6W Bax9s 13xSMD Bulb 12V - Yellow

With 13 powerful yellow LEDs. Used as blink lights.

H6W BAx9s bulb with 13 powerful/yellow LEDs. Used as blink lights.
Note: switch turn signals bulb with a LED bulb light will typically blink faster as usual. We will, therefore, be forced to use "cheat resistors", which uses the same effect as an ordinary light bulb. Note that the brightness is equivalent to about 10 Watts.

Please Note!!! High heat from the headlights/remote spotlights shortens the life of the LEDs.

The diameter of the bulb is 11 mm.
Length: 45 mm (measured from the bottom to the diode peak).
A built-in voltage regulation protects against too high charging voltage.

REF. no: BA9s, T4W, 233, 12929, 12V
