

5 pcs. Mini LED Spot 12V DC

A smart little LED spot, which is typically used in conjunctions in indoors.

A smart little LED spot, which is typically used in conjunctions in indoors. The diode is built into a metal bushing with Chrome or Black surface and threaded, so you can screw the diodes. They should only have a fitting opening of Ø 9 mm and ca. 1 cm space at the back and will not heat during use.

One metre cable on each spot
