H3 LED bulb 24V-Round

H3 socket with powerful SMD diodes with 13 SMD LEDs

H3 LED bulbs with 13 powerful SMD 3-Chip LEDs. The brightness is equivalent to approx. 15 Watt so they cannot replace ordinary halogen bulbs

The white model can be used as day-daytime running lights in the headlights and fog lights. The color corresponds to approx. 6000K. The yellow bulb can be used in indicators.

There is a built-in voltage regulator so that the LEDs are protected for over voltage, this gives you also a longer life.

Note: The does not tolerate high heat, so they must not be mounted in the same lamp body as halogen bulbs.

The bulbs are unfortunately not E-approved.

- Full length of the bulb: 51mm.
- Length from socket: 40mm.
