The advantage with SMD LED is that the light scatter is very broad and compared to a normal MR16 bulb, this LED bulb gives a light equivalent to 25 ~ 30 Watts.

The light scatter is 120 degrees and the LED bulb has the same dimension as a traditional MR16 bulb with $\varnothing 50\text{mm}$.

This is suitable for outdoor use, since the LEDs are protected behind the front glass. This bulb is also suitable for use in photovoltaic installations, caravans, motor homes and boats , since it has a built in 10-30Vdc voltage regulation.
