2 PCs 5 mm RC Diodes in Parts 6-9 Volt

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. or techflex, mounting frames, wire and assembly instructions.

These diodes are particularly well-suited for the headlights/fog lights as the LEDs have a concentrated dispersion and a high brightness. The diodes have clear/transparent lens.

Depending on the connection you want, you can find different connectors, switches, batteries and battery holders under RC-Accessories.

Yellow
SKU 130422
Operation Voltage: 6-9V @ 20mA
Color: Yellow
Wave Length: ~ 589nm
Brightness: 1300mCD
Lens type: Diffuse
Light Scattering: 120 °

Red
SKU 130412
Color: Red
Light Scattering: 120 °
Brightness: 1000mCD
Operation Voltage: 6-9V @ 20mA
Lens type: Diffuse
Wave Length: ~ 625nm
