

## 2 x 3 mm RC Diodes in Parts 6-9 volt

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

2 pcs. LEDs with built-in resistors for 6-9 Volt. Incl. a techflex, mounting frames, a wire and assembly instructions.

These diodes are particularly well-suited to the headlights/fog lights as LEDs have a concentrated dispersion and a high brightness. The diodes have a diffuse/white lens.

Depending on the connection you want, you can find different connectors, switches, batteries and battery holders under RC-Accessories.

### Blue

SKU 130401

Operation Voltage: 6-9V @ 20mA

Color: Blue

Lens type: Diffuse

Light Scattering: 120 °

Brightness: 1000mCD

Wave Length: ~ 470nm

### Red

SKU 130411

Operation Voltage: 6-9V @ 20mA

Color: Red

Wave Length: ~ 625nm

Lens type: Diffuse

Light Scattering: 120 °

Brightness: 1000mCD

### Yellow

SKU 130421

Operation Voltage: 6-9V @ 20mA

Lens type: Clear glass

Wave Length: ~ 589nm

Light Scattering: 30 °

Brightness: 3500 mcd

Color: Yellow

### Green

SKU 130431

Color: Green

Brightness: 1300 mcd

Light Scattering: 120 °

Wave Length: ~ 525nm

Lens type: Diffuse

Operation Voltage: 6-9V @ 20mA

### White

SKU 130451

Light Scattering: 120 °

Lens type: Diffuse

Operation Voltage: 6-9V @ 20mA

Color: White 7000K

Brightness: 1100 mcd

Wave Length: X → Y = 0.31 0.32
