CLEARENCE: Matronics Sublight Underwater Light - Single Color Lamp

Very powerful single-color LED underwater lamps for your boat.

Our LED lamps for underwater light have 3 powerful High Power LEDs in one single color. The solid aluminum and plastic surface make the lamp water impact resistant, while potting the Electronics in polyurethane makes the lamp completely waterproof. This combination creates a lamp that is perfect for mounting under water.

The 3 x 3W high power LEDs from Edison Opto together give a very bright light and the degrees lenses provide a highly focused beam of light.

The lamps are easy to install, since they have a built-in power supply that makes it possible to connect the lamps directly to 12V DC without the need for external power or control.

Improvements in version 2

- Can now be connected to both 12V and 24V. Version 1 is 12V only.
- Higher quality profiles, that are now CNC machined instead of laser cut
- Deeper and more durable annodizing of the profiles
- Ends with a better design, that now removes the need for special washers when mounting.

Specifications

Dimensions	140 x 25 x 25 mm
Voltage	12V (version 2 12V + 24V)
Wire	2 meters mounted on the back side
Mounting Holes	6mm, distance 125 mm
LEDs	High Power - 3W from Edison
Consumption	9W
Optics	Focused beam, 15 degrees
IP	68

New version 2, Red (3 pcs left)
SKU 720206

New version 2, Warm white (ONLY 2 PCS LEFT)
SKU 720210

Version 1, Yellow - ONLY 12V (ONLY 9 PCS LEFT)
SKU 720009
Lumen: 3 x 160
