LED Stary Sky, 150 pcs. 1mm fibers, warm white

Powerful fiberlight Stary Sky with 5W warm-white LED as light-source. The fibers are 2 metres long.

A poweful fiberlight Stary Sky with 5W warm-white LEDs as the light-source. The fibers are 2 metres long.

The wireless remote makes it easy to turn the light on and off, as well as to set the dimming. The chosen function and brightness will be saved and will start again when powered on.

The emitter is supplied with 12Vdc via the included 230V adapter. You can also supply the emitter with 12V directly, for example from your car or a battery, using a DC plug (2.1mm).

There is only an English manual included.
