

## Roll with a heat conductive tape

Heat-conductive tape that can be used to mount High Power LEDs on metal-surfaces. Various widths.

A large roll with a heat-conductive tape that can be used to mount high power LEDs on metal-surfaces.

Buy online at:

[www.matronics.eu/130571](http://www.matronics.eu/130571)

The thickness of the tape is 0.15 mm.

- Material: Fiberglass
- Thickness 0.2mm
- Heat conductivity 800mW/mK
- Operating temperature -20 to 120 degrees
- Tensile strength 7.1N/cm
