Complete AMP Superseal 1.5 plugs for 1.5mm²

Complete sets for male and female Superseal 1.5. Choose between plugs that consists of housings, terminals, wire-seals.

A complete sets for Superseal 1.5 plugs that consists of a housing, terminals, wire-seals. The included terminals fit 0.75 - 1.5mm² conductors. Notice that you need a matching crimping tool to crimp the terminals.

It is possible to purchase a rubber-base for 2, 3, 4 and 5-terminal connectors, which all encapsulate the plug even more and protect the crimps when taking two connectors apart.

Terminals

It is also possible to buy extra metal-pins if the crimping is not successful.

Wire seals / gasket

The wire seals can be destroyed by a bad crimping, so it can be beneficial to have extra ready. They are available in 3 sizes, set by the outer diameter of the wire insulation. Typically you will use the yellow for 0.75 - 1.5mm².

Fastener for male terminal plugs

The fastener is pushed in a suitable 8mm hole (0,8mm til 2.5mm thickness), and the male-terminal plugs is slid over the fastener.
