

Serie 30 & 40 - Transport-wheel

Wheel with or without lock-pedal. Can be used for movable tables and other objects that should be easy to move.

Wheel with or without lock-pedal. Can be used for movable tables and other objects that should be easy to move.

The optimal way to mount them is using a center plate, or you can use them in the ends of series 30 and series 40 profiles, where it is possible to cut a M8 thread.

The wheels are plastic with different diameters and thickness. Wheels of the same type (with and with no brake), has the same basic dimensions.
