

E27 Proxima LED bulb, A55, 230V

LED filament bulb that lights up as traditional incandescent bulbs. The bulb has the same dimensions as a normal E27 bulb.

LED filament bulb that lights up as traditional incandescent bulbs. The bulb has the same dimensions as a normal E27 bulb.

The special LED filaments light up as incandescent filaments and the bulb is especially useful in chandeliers and similars, where the bulb is visible.

The 3W bulbs are equivalent to 25W incandescent ones, while the 4.5W bulb is equivalent to a 40W incandescent one.
