

Resistors for Standard LEDs - 100 pcs. in a Bag

Resistors that fit our 3mm and 5mm LEDs. Choose between resistors that are used for connecting the LEDs to 6V, 12V and 24V.

Resistors that fit our 3mm and 5mm LEDs that give you a bright light without affecting the lifetime of the LEDs. You can choose between resistors that are used for connecting the LEDs to 6V, 12V and 24V.

You must pick the type that fits the voltage drop of the LEDs, for example 2.2V or 3.6V, and that also match the input voltage, for example 12V.

Note that LEDs for 24V use the same resistor.

Buy online at:

120 ohm (3.6V - 6V)

SKU 130701

Max-power: 0,5W

180 ohm (2.2V - 6V)

SKU 130702

Max-power: 0,5W

510 ohm (3.6V - 12V)

SKU 130711

Max-power: 0,5W

620 ohm (2.2V - 12V)

SKU 130712

Max-power: 0,5W

1200 ohm (24V)

SKU 130721

Max-power: 1,0W
