

80W CREE LED IO-30V - BAUISS Canbus

A very bright LED bulb with 16 x 5W LEDs from CREE. The bulb uses 10W, but is equivalent to a 40W incandescent bulb.

A very bright LED bulb with $16 \times 5W$ LEDs from CREE. The bulb uses 10W, but is equivalent to a 40W incandescent bulb.

The 12 LEDs are placed with 4 at the front and 3 on each side, which gives you a very good light-scattering in the lamp-reflector.

Their naturally high consumption makes it possible to avoid bulb control errors in most cars, but in some it might be necessary to add external resistors.

You can of course also use these bulbs in cars without a bulb-control.
