Matronics Neon top lamp for Volvo 2012+ Type 4

They fit the corners on the low sleeper cab (CAP-LSLP) and the middle of a standard sleeper-cab (CAP-SLP).

They fit the corners on the low sleeper cab (CAP-LSLP) and the middle of a standard sleeper-cab (CAP-SLP).

There is no rubber base or screws included, as you reuse the original. If you want to use these in the corners, you will have to use the original wedged rubber bases.

Dual color models

Dual color corner-lamps change between yellow and white light, by swapping plus and minus. This requires changing the original wiring, and is controlled with a color changer controller or a 2-pole switch.

Extra neon lamps

The Neon lamps can also be bought seperatly, if you wish to use them elsewhere on the truck.
