PROCAR Cigar plug with Screw Terminals and a Fuse

A cigar-plug that is easy to connect with the built-in screw terminals. With or without the built-in 8A fuse.

A cigar-plug that is easy to connect with the built-in screw terminals. It is available with or without a built-in 8A fuse, which ensures that you avoid problems if shortscircuits happens.

Fits both standard cigar plug and the new mini plug (DIN 4165)

The cigar-plug is dissasembled by turning the red bottom, where after you unscrew the one screw. The plug can then be fully opened.

The fuse is a standard 8A GBC / torpedo fuse.
