LED Position Marker for Mercedes Actros

A special lightsource that replaces the original white LED light sources in Mercedes Actros' top position lights.

A special lightsource that replaces the original white LED light sources in Mercedes Actros' top position lights (9608202756 + 9608202856). The pins and LEDs are as standard, so replacing these is simple with the correct tool.

The single color model is a 1:1 replacement, and does not require any electrical changes.

The dual color model changes color when you flipping plus and minus. This can be done using our polarity flipper / color changer controller, that is inserted in the wiring harness to the position lights.

Mounting

The light source is replaced by making a cut in the original lamp, so that the light source can be tilted out. When it has been replaced, you simple push the plastic back again and seal it with a white sealant.

We recommend you use a multicutter, eg. dremel, with a cutting tool.
