

Voltage regulator with display, 3V-40V Input, 1.3V-35V Output - 2A

Compact voltage regulator with built-in display, that can show output and input voltage. Easy adjustment with screwdriver.

Compact voltage regulator with built-in display, that can show output and input voltage. The output voltage is easily adjusted with with screwdriver on the small potentiometer. Counterclock wise reduces the voltage, clockwise increases it.

The regulator has a input voltage of max 40V DC, and can reduce the voltage down to between 1.25 and 37V DC. Maximum 2A is recommended for optimal stable operation, it is also possible to add a heatsink and then max current is 3A.
