Connectors that fits the lamps on Scania +2016 trucks. There is ½ meter red and black wire on the connector.

Buy online at:

[www.matronics.eu/240863-1](http://www.matronics.eu/240863-1)

You can use these if you want to make your own harness, or if you want to mount these in other places than standard.

### Connector, Female

Can be used to connect original sun-screen lamps and side marker lights. There is ½ meter red and black wire on the connector, and a strain relief.

### Connector, Male

The same connector which are on the marker lights. Can be used if you want to use the original female connector, but want to connect a different type of lamp. There is ½ meter red and black wire on the connector, and a strain relief.

### Connector, Y-splitter

Splitter with one male, and two female plugs. Can be used if you want to connect to lamps to one female plug. There is ½ meter red and black wire on all connectors.

### Strain relief

Usually there should not be any pulls / strains on these wires, but if you want, you can buy strain relief separately. They are clicked on, and fastened with a cable tie, which secures the cable to the connector.
