

Prostroke Corner, R65

Powerful arched LED strobe, that has an extra wide beam. ECE R65 approved.

Powerful arched LED strobe, that has an extra wide beam. The lamp is intended to be mounted in the corners of the vehicle, and by mounting two in the front, and two in the back, you get a 360 degree cover. The lamps could be a cheap alternative to larger light bars.

The 12 high power LEDs create a bright flash, and the 26 different effects, give you a high degree of visibility. The lamp also has split-functions, where it flashes alternating left and right. The lamps can NOT be synchronized with other Prostroke lamps.

The lamp can be mounted with the included tiltable bracket, or surface mounted by using the pinol screws, that can be bolted in the ends of the lamp.

The lamp is ECE R65 approved for road use, and also R10 EMC approved.
