2 pcs Hella Universalbracket for drivinglights

Can be used for stabilizing of the driving lights to reduce shaking.

Universal bracket for mounting between the rear housing of the lamp and the vehicle so that shakes do not propagate in the driving lights. Typically used when the driving lights are mounted on a soft surface such as fiberglass spoilers and plastic bumpers. Then there may be a risk of the lamps will be tilting / shaking while driving, with the result that the light will vibrate up and down on the horizon.

Hella 8HG 116 741-801

On most Hella lamps you will have to make a hole in the rear lamphouse, while most of our other round LED headlights are prepared with an extra screw / bolt that is ready for mounting.
