

Black-series COMBO LED light-bar, E-approved IO-30V

E-approved doppel rowed LED light-bar that gives you the best of both spot- and flood-light. Available in different lengths.

E-approved LED light-bar in our Black-series with a double LED line and a powerful combo-light, that is designed in a nice and slim black housing. With "hidden" LED's that gives an anonymous look and discreet look with the dark background.

The combo-light takes the best of a "spot-" and "flood" light bar. On each side, there are flood lenses and in the center, spot lenses. This way you have a good combination of the broad light spreading from the sides and the focused light in the center.

The LED lightbar is produced in an aluminum housing with a glossy black finish. The result is a light and slim design with optimal cooling for the LEDs. The front glass is polycarbonate, which has a very high tensile strength.

The light bar comes with a cable mounted to a waterproof connector.

18cm version has Deutsch DT connector

56cm version has ATP connector
