

H4 Osram Night Breaker LED kit, +230% 2 pack, E-approved

E-approved H4 LED headlight kits for legal use on public roads made by Osram.

E-approved LED headlight kits by OSRAM, in their Night Breaker series.
Legally usable on public roads.

In this [overview](#), you can see Osram's list of approved vehicles for this specific LED headlight.

The kits are complete with two LED emitters, and connector/cable sets for replacing the original emitters with 6000K. For cars with bulb-control, it is also possible to purchase Canbus kits for 12V.

Large light output

The light output is 1650 / 1000 (high / low) lumen pr. LED bulb - A standard halogen bulb is typically around 1000~1500 lumen.

Mounting

It can be a bit tricky to find space to mount the LEDs on some cars since they need more space in the headlamp than normal halogen bulbs.

CANBUS / Pear Control

For some cars, it may be necessary to go with canbus kits to avoid error messages on the car lamp control.
