

10 pcs. Green SMD module-12V

Splash-proof LED modules with a green light, which can be used for example as signal lighting.

Splash-proof LED modules with a green light, which can be used for example as signal lighting.

In each LED module sit 3 pcs powerful SMD diodes and on the back, there is a powerful 3 m tape.

LED modules are built up in chains with 10 pcs. and there is a 10 cm wire between each.

The modules connect to 12Vdc and the chains can be extended or shortened up as needed.

Thus, it is a very flexible solution covering many needs such as illuminated signs and decorating tasks.

Consumption per 10 pcs.: $12V \times 0.6 (A) = 7.2 W$
